

ABSTRACT OF DISCLOSURE

An LCD glass cassette to store glasses to be mounted on an LCD. The LCD glass cassette has: a side frame and a rear frame, respectively having a side supporter and a rear supporter to respectively support and supporting a side edge and a rear edge of the glass; and a front frame with a front supporter supporting a front edge of the glass. Thus, there is provided the LCD glass cassette capable of effectively preventing bending of LCD glass while the glass is stored.
